Miami's first lighted
cabinet, introduced
in 1925.

(Left) Illustration "D"
Electrically lighted cabi-
net for the home — also
introduced by Miami in
1925.

Illustration "E"
Miami's new fluorescent lighted cabinet.

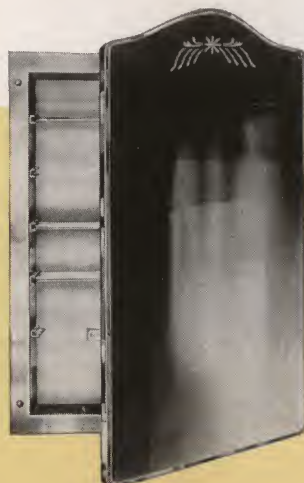

Illustration "F"
In 1941, Miami introduced the first all-
aluminum bathroom cabinet — withdrawn
now for the duration of the emergency.

Illustration "G"
THE IMPERIAL
One of Miami's latest chrome
trimmed, indirect lighted, bath-
room cabinets.

*S*WENTY-THREE years ago, The Miami Cycle and Manufacturing Company, manufacturers of the famous Racycles, Bicycles and Flying Merkle Motorcycles, introduced MIAMI steel bathroom cabinets to the architectural and building fraternity.

When Miami entered the bathroom cabinet field, approximately 90 per cent of the cabinets then sold lacked eye appeal (see illustration "A"), were not fireproof and were subject to warping and decay.

In 1923, The Miami Cabinet Company was organized to take over the bathroom cabinet business of The Miami Cycle and Manufacturing Company. Steel bathroom cabinets of this period all resembled illustration "B". Although they showed little improvement in appearance over the early wood cabinets, the doors did not stick and they were sanitary and long lasting.

In January, 1925, MIAMI designers introduced the first electrically equipped hotel cabinet. Later on, in the same year, they presented bathroom cabinets fitted with light fixtures for the home (see illustrations "C" and "D").

Other improvements introduced by MIAMI were the Panel Venetian type of cabinet; the mirror clips that replaced the old, ugly rosettes; the chromium plated razor blade drop; "Crystal Snow," the finish that will not retain a stain; and Alumilited Aluminum Cabinets (illustration "F").

In 1933, The Philip Carey Manufacturing Company, an institution of international scope, purchased The Miami Cabinet Company, and thus linked together two famous trade names, *Miami* and *Carey*.

Since 1933, Miami-Carey progress has been rapid, because Miami ideas have been in line with the world-wide modernization of the bathroom. Each year, Miami has introduced innovations in convenience and beauty that have set the pace for the industry. The fluorescent lighted cabinet (illustration "E"), with convenience plug for electric razor, etc., incorporates the very latest improvement in lighting efficiency with beauty and convenience of cabinet design. The Imperial model (illustration "G"), distinguished by the artistic and skillful harmonizing of chrome and glass, is, in the words of a famous architect, "America's premier cabinet." Other distinctive models offered only by MIAMI are the Master Ensemble, Powder Puff and Stainless Steel models, illustrated and described in the pages of this catalog.

MIAMI has not only led the industry by pioneering distinctive and useful models, but each year has introduced improved manufacturing facilities, so that, today, the modest cottage may be equipped with a modern steel bathroom cabinet, fitted with electric lights and electric convenience plug, wired complete at the factory, at a lower cost than that of a much inferior cabinet of twenty-four years ago.

GLORIFYING THE AMERICAN BATHROOM

MIAMI CABINETS • ENSEMBLES

ALL models and units illustrated on catalog pages 4 to 13, inclusive, are Miami ensembles, cabinets or individual units. These models are representative of the finest in cabinet design and construction. Only the best materials obtainable are used in the manufacture of the Miami Line.

MIRRORS

All mirrors are "A" quality genuine plate glass. No finer mirrors can be purchased. All mirrors are "Electrolytic" *copper backed*, guaranteed for five years against silver spoilage.

BRASS

All brass used for mirror frames, hinges and other parts is specially rolled to our specifications so as to insure a first-quality chromium finish.

PLATING

Chrome plating is in strict accordance with the best specifications for this type of plating so as to insure an everlasting and lustrous finish.

HINGES

All door hinges, except the hinge on the Duchess and Moderne, are piano type, *brass, chromium plated*. The Duchess and Moderne hinge is of a special type.

STEEL AND CONSTRUCTION

The steel used in the Miami Line is ARMCO prime sheets, 18-gauge, specially prepared for enameling.

The bodies of all cabinets in the Miami Line are formed from one piece of steel so as to make a one-piece body. No open seams or joints to rust or gather dirt.

All door strikes are *stainless steel*; bullet door catches are *brass, chromium plated*. Door stops are the bar type, *brass, chromium plated*.

Shelf supports in the Miami Line are *stainless steel*. The "U" type bracket prevents the shelf from being upset. The two bottom shelf brackets are arranged to accommodate six toothbrushes.

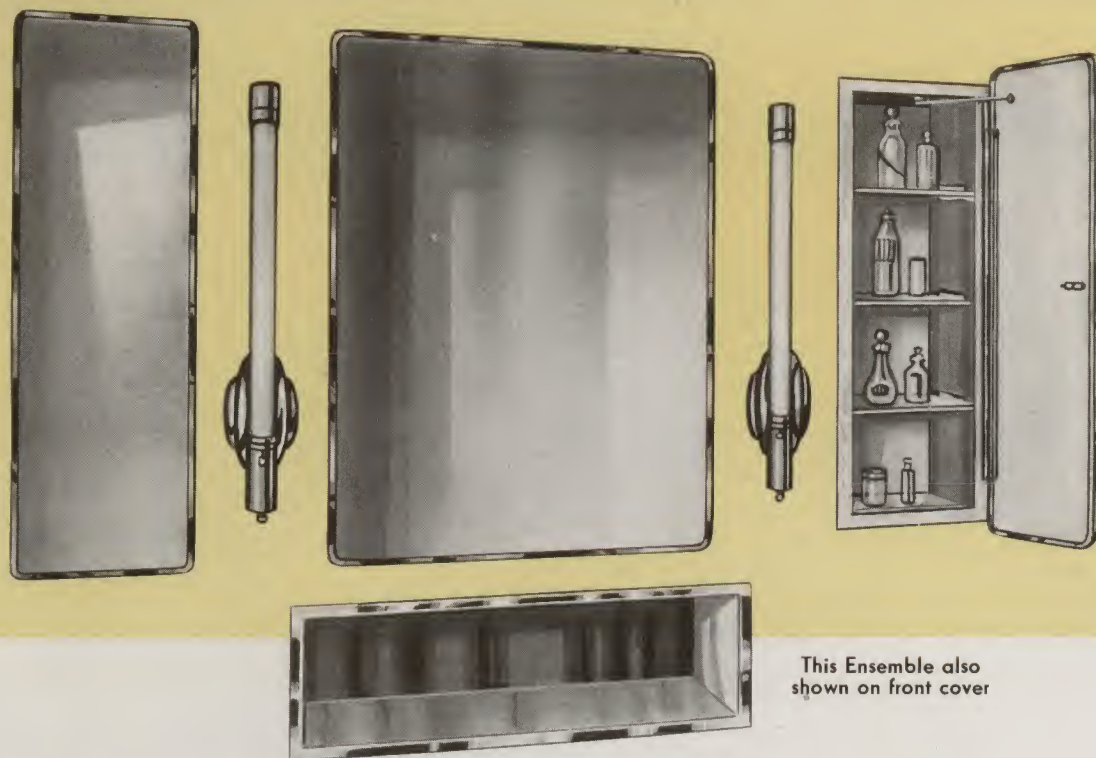

FINISH

A cabinet is no better than its finish. The finish used on all models except Stainless Steel Models in the Miami Line is *Crystal Snow*, a non-porous finish of a pyroxylin nature applied by a special process. It is guaranteed not to discolor with age, crack, craze or peel. The original lustre will remain indefinitely in spite of frequent cleaning to remove stains, a fact which earned for *Crystal Snow* the title "The finish that won't retain a stain."

THE MASTER'S ENSEMBLE

On the threshold of a new decade, MIAMI-CAREY looks with pardonable pride upon the past ten years of accomplishment. During this period we pioneered each year in the design improvement of bathroom cabinets and ensembles for the modern home — having introduced to the architectural profession and building trades, cabinets that were new in design, unique in completeness and beautiful in appearance.

Entering this new decade, we present, in the MIAMI-CAREY manner, the Master's Ensemble, illustrated above. Designed for the bathroom of the master, the unit is not merely a bathroom cabinet, but rather a complete ensemble combining into one unit perfect lighting, an abundance of storage space for toilet articles, the utility of a recessed shelf, advantage of a permanently affixed-to-the-wall center mirror that does not require opening or closing to gain access to the toilet articles.

DETAILS OF THE MASTER'S ENSEMBLE

The center piece of the ensemble is a beautiful chromium framed mirror, permanently attached to the wall with concealed hanging brackets. There is no cabinet behind the mirror.

The unit below the center mirror is a chromium framed, mirror-lined, recess shelf — conveniently located and serving as a safe repository for the razor, the shaving brush, the cream, lotion and other toilet articles in use at the moment.

Located on both sides of the center mirror are individual cabinets finished inside in Miami *Crystal Snow* white finish. Three glass shelves are furnished with each of these cabinets. The storage space in these two cabinets is equal to that in the majority of the largest individual bathroom cabinets manufactured.

If two people are using the master bathroom, this two-cabinet arrangement is ideal — a cabinet for the toilet articles of each individual.

FLUORESCENT LIGHT BRACKETS

The lights are the new fluorescent fixtures — the new amazing “daylight” light. The design of these light fixtures is in keeping with the graceful, curved corners of the center mirror and the doors of the two side cabinets. The fixtures are wired at the factory and are complete with bulbs.

CONSTRUCTION DETAILS

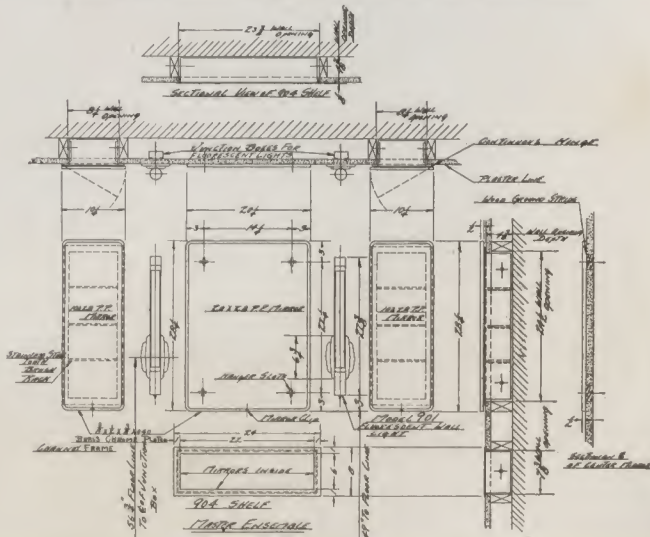

The center mirror and the mirror doors of the two side cabinets are set in brass, chromium plated frames; one-piece construction with no open seams at the corners. The single joint in these frames is covered with an artistically designed chromium plated mirror clip.

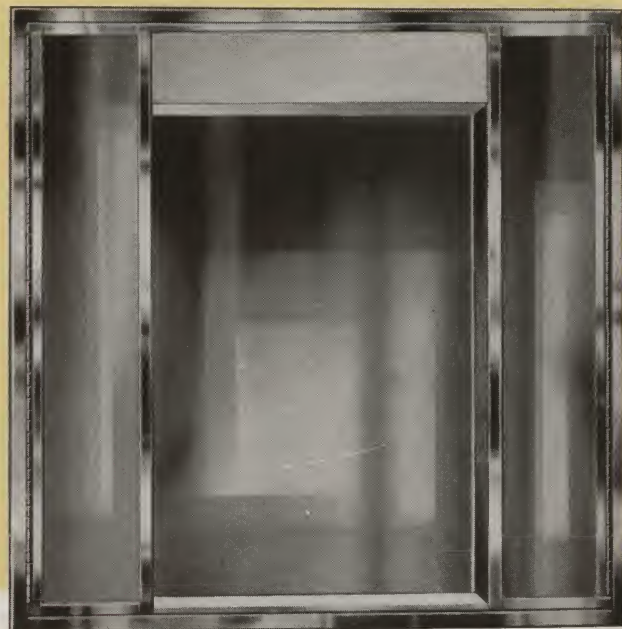

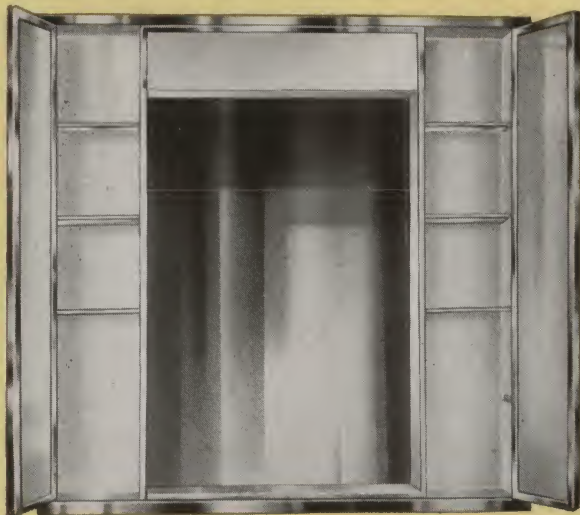

The frame around the recessed shelf underneath the center mirror is *brass, chromium plated*.

The fluorescent light fixtures are all chromium plated.

All mirrors are "A" quality plate glass, electrolytically copper backed; guaranteed for five years against silver spoilage.

See detail at bottom of page for installation instruction.

MIAMI IMPERIAL CABINET

Here is an exclusive, distinctive, DeLuxe Model for those of discriminating taste — the very finest cabinet that money can buy. The Imperial is distinguished by the skillful harmonizing of Chrome and Glass. The frame around the entire cabinet is *brass, chromium plated*. Spacious side cabinets, one on each side of the large recessed mirror, have chromium framed mirror

doors swung on *brass, chromium plated* piano-type hinges. Cabinets are finished inside in white *Crystal Snow* and are equipped with three glass shelves, *stainless steel* shelf supports and toothbrush holders. Under the center mirror is a white opal shelf.

The inside walls projecting outward from the center mirror are faced with mirrors that match the large center mirror.

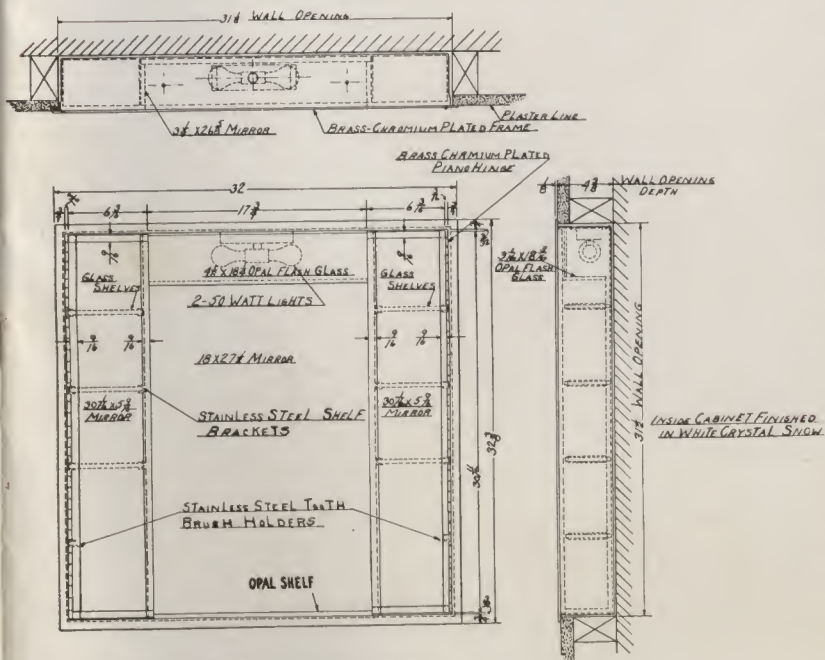

The lighting arrangement is indirect. Two light bulbs concealed behind the opal glass panel at top of the center mirror provide perfect reflected light for shaving or dressing the hair. If fifty-watt or larger bulbs are used, the light is sufficient to provide adequate illumination for the average bathroom, only cabinet of its type to provide sufficient light. All wiring is completed at the factory.

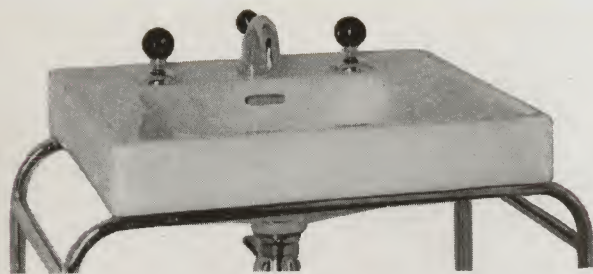

The rose (flesh) colored mirrors may be had if required.

[See page 3 for additional specifications]

Color makes the bathroom of today attractive and alluring. The Oxford, finished in color to match tile, bathroom fixtures or the color scheme of the room, is the last word in modern planning. The Oxford can be finished in any color desired at a slight additional cost. See price list for cost in special colors.

Storage cabinets are located on each side of the mirror. The door frame of the storage cabinets is *brass, chromium plated*. The shelves, three on each side of the cabinet, are plate glass. The center mirror is recessed four inches back from the front of the cabinet. There is a white opal shelf at the bottom of the center mirror, a convenient place for toilet articles.

The frame around the entire unit is *Armco* prime stock steel regularly finished in white *Crystal Snow*.

The light brackets, concealed behind the white opal glass panel at the top center of the cabinet, are arranged so as to reflect light onto the center mirror and thus provide illumination for making the toilet.

Light is also reflected out into the room through the front light panel, providing sufficient illumination for the average bathroom. Regular type bulbs up to 75 watts may be used. We do not furnish the bulbs.

All wiring is completed at the factory.

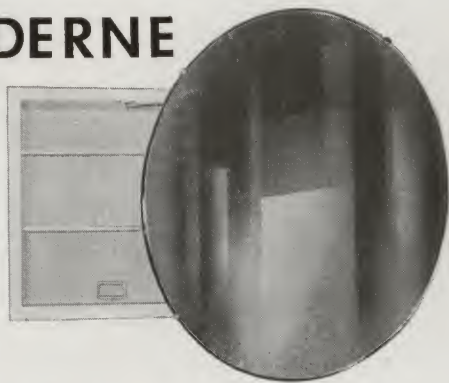

The DUCHESS

The Duchess is a spacious cabinet concealed behind a beautiful circular mirror set in a *chromium plated* frame of *brass*, styled to match today's modern bathroom fixtures and accessories.

The ingenious hinge, on which the door is swung, permits the door to be pulled outward over the lavatory so that when opened the mirror is only a few inches from the face of the individual — an ideal arrangement for shaving or dressing the hair.

The MODERNE

The Moderne is similar to the Duchess except that there is no frame around the mirror. The mirror has a beautiful beveled edge and is attached to the solid steel door with *stainless steel* mirror clips.

When installed in the wall, the Duchess and the Moderne look like beautiful circular mirrors hung on the wall.

Two plate glass shelves, adjustable to three positions, are furnished with each model. The razor blade drop in the back wall of the cabinet is *brass, chromium plated*.

Both of the above models are protected by U. S. Patent No. 2130556.

SPECIFICATIONS — THE DUCHESS and MODERNE

Mirror size.....26" circle
Wall opening.....16½"x16½"x4¼"

The POMPADOUR

CIRCULAR MIRROR and RECESSED SHELF

The Pompadour, an ideal unit for the guest bathroom, the downstairs lavatory or the dressing room, consists of a 26-inch circular mirror and glass lined recess shelf. There is no cabinet behind the circular mirror. Steel back on which the mirror is mounted is fitted for concealed hanging on the wall.

The frame around the lower recessed shelf is *brass, chromium plated*. The shelf itself is lined with mirrors. The colors available are blue, green, gun metal, rose (flesh) or regular silver. By using suitable colors in the lower shelf, beautiful effects can be worked out that will harmonize with bathroom color schemes.

The circular mirror is usually finished in regular silver. The new rose (flesh) color mirror is available at slight additional cost.

SPECIFICATIONS FOR LOWER SHELF

Wall opening.....23⅜"x7⅜"x4⅜"

When ordering, please specify color desired for recessed shelf — blue, green, gun metal, rose (flesh) or regular silver.

Showing four of the Powder Puff
 ensembles in a large Detroit
 Theater.

THE POWDER PUFF

Dressing Room Mirror

In the home of today, the Powder Room is almost as essential as was the bathroom in the house of the late nineties.

The custom-built Powder Puff unit, as illustrated, adds the final touch to the modern powder or dressing room. Architects, contractors and home owners have indorsed the Powder Puff as the most complete and distinctive dressing room unit yet offered to the public.

DETAILS OF CONSTRUCTION

The outside frame is *brass*, finished in lustrous *chromium plate*. The large center mirror is the new alluring rose (flesh) color. Regular silver mirrors may be had if desired.

The small mirrors on either side of the large center mirror are optional as to color — either rose (flesh), gun metal, blue, green or regular silver. The recessed lower shelf may also be had in the same colors as the small side mirrors or in regular silver.

The light brackets are concealed behind the two small side mirrors and are so located that the light is reflected onto the large center mirror through ground glass panels. Four 18-inch, 60-watt Lumiline bulbs, two on each side of the center mirror, provide perfect illumination. These four bulbs will be furnished when ordered. See price list for extra cost.

All wiring is completed at the factory.

When ordering, please specify color of mirrors desired.

MIAMI CABINET DIVISION

MIAMI Towel Supply and Utility Cabinet

The location of the bathroom cabinet, above the lavatory, makes it impractical to install a long and large cabinet in this position, because the articles stored on the top shelves of the cabinet would be out of reach of the average individual.

Extra storage space is a necessity in many bathrooms. The cabinets illustrated on this page not only provide this extra space, but the large mirror, sixty inches in height, serves as a full length bathroom mirror, a feature appreciated by every woman building or remodeling a home.

CABINETS No. 510-A, 510-B

These two cabinets are designed for the luxurious bathroom. The beautiful mirror is set in a large *chromium plated* frame. The heavy air-cushioned door is swung on *brass, chromium plated* piano hinges.

No. 510-A is eight inches deep. No. 510-B is six inches deep. Five plate glass shelves are furnished with each cabinet, providing an abundance of shelf space for the storage of towels, other bathroom linen, extra toilet accessories and bathroom supplies.

ALL STAINLESS STEEL

New Beauty

Nos. 3000, 3050

Nos. 3100, 3150

For a number of years, we have been testing bathroom cabinets made throughout of *stainless steel*. Out of this research, we have developed a product which we are confident will uphold the MIAMI-CAREY reputation and good name, long established . . . a new line of deluxe models reflecting the brilliance of this polished steel and possessing rustless and longer wearing qualities.

FOR SEACOAST AREAS

These cabinets should have a special appeal to those residing in seacoast regions where corrosive salt air affects ordinary metals. *Armco stainless steel* is a solid, rustless metal without coating or other finish to wear off. Its smooth surface is easy to keep clean and sanitary. Spillage of medicines and other items usually kept in the bathroom, when promptly wiped off, cannot injure this durable metal.

IMPORTANT DETAILED INFORMATION

FRAMED MODELS

Cabinets illustrated on this page have mirrors framed with *stainless steel* frames. These highly polished frames are a perfect match for *chromium plated* bathroom fixtures. The frame is made in one piece with the single joint covered by an artistically designed mirror clip.

The Venetian-top cabinet illustrated at the upper left hand corner of this page is available in two sizes as specified below.

The rectangular or square-top mirror cabinet, as illustrated in the lower left-hand corner, is likewise available in two sizes as specified below.

The mitered line mirror, as illustrated, is regular equipment. A plain mirror, without mitered line or other decoration, is available if required.

REGULAR EQUIPMENT

. . . for these *stainless steel* cabinets consists of four plate glass shelves (three for brackets and one for bottom of the cabinet), two toothbrush racks and a used razor blade drop.

ONE-PIECE BODY

All cabinets illustrated on these two pages are made of one-piece *stainless steel*; all corners reinforced with heavy gauge *stainless steel* angles; shelf supports and door strike likewise of *stainless steel*.

The door hinge and razor blade drop are of *brass*, *chromium plated*.

BATHROOM CABINETS

Longer Wear

Bodies and all metal parts are made of *Armco stainless steel*. Yet, with all of their fine quality, these cabinets are not beyond the reach of most pocketbooks. Although the initial cost may be somewhat higher than the familiar steel cabinets, assured longer life and added beauty make them a good investment.

LASTING BEAUTY

The exceptional beauty of these new *stainless steel* models adds a new decorative effect to modern bathrooms. The soft, satiny finish of the body section, together with the highly polished mirror frame of the same metal on the framed models, page 10, provides a contrast that will never lose its attractiveness.

OF ALL STAINLESS STEEL CABINETS

ALL-MIRROR FRONT MODELS

The cabinets illustrated on this page are known as all-mirror front models, with no knob, hinges or ugly screw holes to mar the face of the mirror.

The beautiful, bevel-edged mirror covers the entire cabinet, so that when the cabinet is set in place, the appearance is that of a mirror hung on the face of the wall. The mitered line mirrors illustrated are regular equipment. Plain bevel edge mirrors are available.

The arched or Venetian-top cabinet, illustrated at top right hand corner of this page, is suggested for the bathroom where arches or curves are used.

The rectangular or square topped cabinet, illustrated at lower right hand corner of this page, is suggested for the bathroom where straight lines are used rather than curves or arches.

Both the arched-top model and the rectangular-top model are available in two sizes specified below.

REGULAR EQUIPMENT

... for these models consists of four plate glass shelves (three for the brackets and one for bottom of the cabinet), two toothbrush racks and a used razor blade drop.

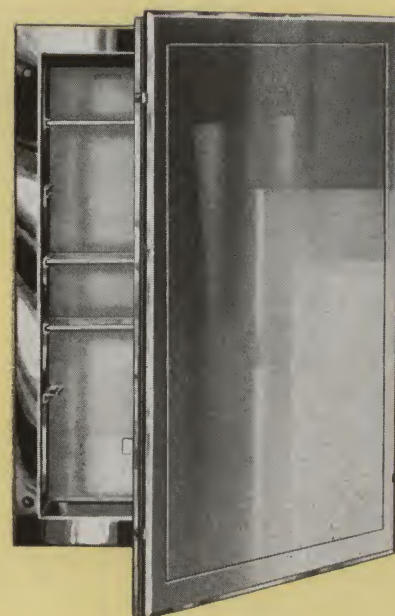

Specify and insist on Miami cabinet of Stainless Steel — "The Everlasting Cabinet."

MIAMI CABINETS

with Chromium Framed Mirrors

VENETIAN TYPE

The deep brilliant lustre of chromium adds attractiveness to the modern bathroom, so that today we find almost all the bathroom fittings and accessories finished in chromium plate.

To keep pace with the trend of bathroom design and decoration, our craftsmen designed the Chrome Framed cabinets illustrated on this page. They are beautiful cabinets with no knob, hardware or portion of the body visible. The one-piece mirror frames are brass with the chromium applied over nickel.

The one-piece frame used on all cabinets illustrated on this page eliminates the necessity of ugly corner clips commonly used to cover open joints. The cabinet body and door back are finished in the famous *Miami Crystal Snow*, noted for its durability.

The heavy *chromium plated* piano hinges are capable of carrying many times the weight of the door — yet they are neat in appearance and are not visible when the door is closed.

SPECIFICATIONS

MASTER MODEL

The cabinets illustrated at the left have the same specifications as the Venetian style illustrated above. These models are suggested for the bathroom where straight lines are required.

The two bottom shelf supports on all cabinets on this page are so designed that they can be used as toothbrush racks. This arrangement does not interfere with the use of the bottom shelf brackets for the support of a shelf if the toothbrush rack is not required.

The Master Model is available in three sizes as listed at the left.

INDIVIDUAL UNITS

The units illustrated on this page make possible a wide choice in expressing individual ideas of beauty and distinction. The combination of these units with other models in the catalog permits the architect and the home owner to make up combinations that will best meet the owner's requirements.

No. 900 — MIRROR-LINED RECESS SHELF

In far too many bathrooms, no storage space is provided for accessories which are either too large or too damp to be stored in the average medicine cabinet. This unit is suggested for installation above the end of the bathtub where it provides storage space for Milady's bath salts, bath brush, sponge and other accessories of the bath. The interior of the unit is lined with beautiful colored mirrors, either rose (flesh), blue, gun metal, green or regular silver. The shelves are glass to correspond with the mirrors.

No. 901 — EXTRA BATHROOM CABINET

The modern bathroom of today is very often equipped with more than one cabinet. No. 901 is an ideal smaller cabinet to be installed alongside of the large cabinet over the lavatory or on walls adjacent to the lavatory.

The door is fitted with a mirror which is set in a *brass, chromium plated* frame. The inside of the cabinet is finished in white *Crystal Snow*. Four glass shelves are furnished — three for the brackets and one for the bottom of the cabinet.

No. 902 — 26" CIRCULAR MIRROR

This beautiful circular mirror, fitted with concealed device for hanging on the face of the wall, is the ideal unit for installation in the small dressing room, for the entrance hall or above the dresser in Milady's boudoir.

It is also a practical and very beautiful mirror for hanging above the mantel in the living room. The mirror may be had in regular silver or in the new rose (flesh) color, the latter at slight additional cost.

No. 904 — MIRROR-LINED RECESS SHELF

This is a smaller mirror-lined recess shelf, suggested for installation above the tub where the larger No. 900 is not required.

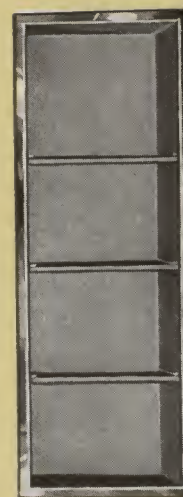

This unit combined with any chromium frame wall mirror illustrated on page 39 is an ideal combination for installation above the lavatory when the cabinet is placed in a different position in the bathroom.

Rose (flesh), blue, green, gun metal and regular silver mirrors are available for No. 904.

LIGHTING IN THE MODERN MANNER FOR MIAMI-CAREY CABINETS

Fluorescent Light Bracket No. 10

Tubular Light Bracket No. 11

Fluorescent
Wall Light
Fixtures

Miami introduced the first electrically lighted bathroom cabinet back in 1925 (see illustration, catalog page 2). In the intervening years, we have not only improved the efficiency of the lighting principle but have also made vast improvement in fixture design.

We present on this page the new Fluorescent lighting for bathrooms and also a new design in Tubular lighting for bathroom cabinets.

Whether you design homes for discriminating clients or for builders to sell, it will pay you to specify a MIAMI or a CAREY cabinet fitted with a set of light fixtures illustrated on this page. This lighting will not only bring new beauty to the bathroom but will also provide efficient illumination at attractive savings in installation costs.

FLUORESCENT LIGHT BRACKET No. 10

At the left is illustrated a MIAMI cabinet fitted with fluorescent light brackets No. 10. These fixtures are attached to the cabinet in such a manner that they become an integral part of the complete unit. Fluorescent light fixtures No. 10, attached to the cabinet, are shipped complete with the light bulb.

The fixtures are chromium plated. There is a convenience plug in the bottom of the right hand fixture, for curling iron, electric razor and other electrical appliances.

Fluorescent light fixtures No. 10 are controlled by a light switch which should be mounted on the wall of the bathroom adjacent to the entrance door. This switch is not furnished with the cabinet.

Fluorescent light fixtures are available for the following cabinets in the Miami and Carey lines: Nos. 1050, 1150 illustrated on catalog page 12; 2020, 2040 illustrated on catalog page 22; 620, 650 illustrated on catalog page 23.

TUBULAR LIGHT BRACKETS No. 11

Photograph in the left center of this page illustrates a CAREY cabinet fitted with Tubular light bracket No. 11.

The metal parts of the brackets are brass finished in a deep lustre of chrome. The glass shade is opal. The fixture is designed to take a T-8 bulb, which is available at all stores that sell light bulbs.

We do not furnish bulbs with the fixtures.

Tubular light bracket No. 11 is available on all cabinets illustrated on the following pages of this catalog: 10, 11, 12, 22, 23 and 24.

The switch that controls the Tubular light brackets No. 11 is located in the bottom of the left hand light fixture. There is an electric convenience plug in the bottom of the right hand fixture, for curling iron, electric razor and other electrical appliances.

FLUORESCENT WALL-LIGHT FIXTURES

Introduced last year for the first time, the fluorescent light fixtures for mounting on the wall met with such instant approval that we are offering them again this year.

Fluorescent lighting is a new sensational indoor light. It is cool and without shadow or glare. It provides more light at less cost.

These fixtures are suggested for use not only in the bathroom but likewise in the entrance hall, the recreation room, breakfast nook, the dressing room, the library. They are also ideal for the office, the hotel lobby, the theatre lobby and other commercial uses.

Miami-Carey fluorescent light fixtures are chromium plated. They are a complete unit, wired at the factory, ready to install without the necessity of rewiring.

These fixtures are supplied complete with bulbs.

IMPORTANT—PLEASE READ

All lighted cabinets are fitted with one inch (1") return flange.

All lighted cabinets increase the height of the wall opening three-quarters ($\frac{3}{4}$ ") of an inch.

All wiring for cabinets fitted with light brackets is completed at the factory and is approved by the Underwriters' Laboratories.

PLUMBING CONTRACTOR'S LETTER
Tells Story of **UNUSUAL SERVICE**
and **SATISFACTION** . . .

Parkchester —

**WORLD'S
LARGEST
APARTMENT
DEVELOPMENT**

Installed
17 CARLOADS OF
MIAMI
BATHROOM
CABINETS

There is little that need be added to Mr. Murphy's letter. The Parkchester order for MIAMI Cabinets was, by far, the largest ever placed in the United States. Notwithstanding its magnitude — over 12,000 cabinets — MIAMI delivered every carload on time, demonstrating its capacity for service as well as for quality of product.

MIAMI leads the world in the production of bathroom cabinets, from the luxurious creations for the finest residences and institutions to cabinets of superior quality and beauty for low-cost and multiple housing projects.

Whatever your problem in bathroom cabinets, you'll find the correct solution in MIAMI'S more than 140 distinctive models.

J. L. MURPHY, INC.
J. L. MURPHY, PRESIDENT

GENERAL PIPING CONTRACTORS
340 EAST 44TH STREET

NEW YORK, July 1, 1941

Mr. P. J. O'Brien, District Manager
Miami Cabinet Division, Philip Carey Co.
60 East 42nd Street, New York City

Dear Mr. O'Brien:

We have just completed the installation of the last of the 12,262 Miami cabinets purchased from your company for the bathrooms of Parkchester, the Metropolitan Life Insurance Company housing development in New York City.

The construction of such a tremendous development as Parkchester presents many problems, one of the principle ones being the on-time delivery of all materials used. Seventeen carloads of Miami cabinets were used in this project. We would like you to know, and we appreciate the fact, that each and every carload of your cabinets arrived on time in accordance with our delivery schedule. We think it remarkable that of the thousands of cabinets delivered, only five were damaged in transit.

The Miami cabinets you furnished us for the Parkchester Project were satisfactory in every respect; likewise, other cabinets furnished by your Company for the Hillside Housing Project and the Williamsburg Housing Project, both in New York City, were also satisfactory and are serving the tenants in these projects well.

Very truly yours,
J. L. MURPHY, INC.

MIAMI

BATHROOM CABINETS

Through outstanding merit and the ability to meet every demand for bathroom cabinets and accessories, MIAMI has established its position as world leader in its field.

MIAMI had its birth in *new ideas*. Through adoption of better materials and improvement in construction and design, MIAMI has pioneered the way and met the desires of a maturing public taste. Year by year, MIAMI has advanced new conceptions in beauty, convenience, cleanliness and utility. Year after year, a large majority of the best homes, hotels, apartments, clubs, hospitals and universities have selected MIAMI-made cabinets.

MIAMI-CAREY

... MAKE BATH

On these pages and the two following, we present a few examples which show the many combinations in which Miami-Carey units may be installed to advantage.

Architects and Builders have long recognized the inadequacy of standard bathroom cabinets and accessories which make no provision for the numerous odds and ends that the housewife likes to keep in the bathroom. To overcome this deficiency, to provide an orderly place for every bathroom essential—to add new beauty and convenience, Miami-Carey ensembles and units were created.

*Bathroom by

CABINET ENSEMBLES

ROOMS COMPLETE

MIAMI-CAREY cabinets are produced in combination units to conform to standard architectural practice. With Miami-Carey units, you may supply a large cabinet for husband and wife; individual cabinets for children; recessed shelves for sponge, brush, bath salts and other supplies; a towel supply cabinet — all the delightful harmony in sizes that make efficient use of wall space and beautify the bathroom.

Miami Ensembles enable architects to obtain effects of individually designed cabinet combinations without the added expense that such special orders usually require.

CAREY BATHROOM CABINETS

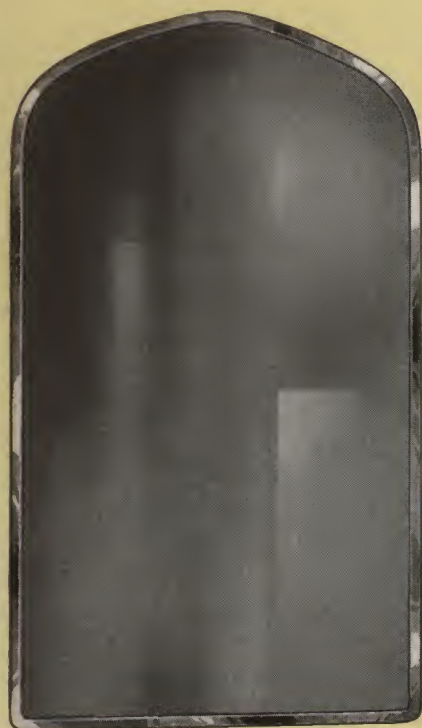

GENERAL SPECIFICATIONS

All cabinets illustrated on catalog pages 22 to 26 inclusive are Carey cabinets. With the exception of the Miami cabinets, the best you can buy are the Carey cabinets. In manufacturing this line, we have employed the same careful workmanship and attention to detail that has distinguished Miami cabinets. Carey cabinets are designed for homes costing from \$6,000 to \$9,000.

Read carefully in the following paragraphs the details of material and construction of all Carey cabinets.

Mirrors — All mirrors are No. 1 quality plate glass manufactured in accordance with Commercial Standard CS-27-36. This is the second best mirror that can be purchased in this country. All Carey mirrors are copper protected guaranteed for five years against silver spoilage.

Hinges — All door hinges, except hinges for the flush door recess cabinets, on page 25, are piano type brass, chromium plated. The hinges on the flush door recess models are butt type brass, chromium plated, semi-concealed.

Nos. 2010, 2020

GOTHIC TOP MODEL

The two cabinets shown on this page are among the most popular in the whole line. They are moderately priced — yet have those features of construction that have made Miami-Carey Cabinets famous, not only throughout the United States, but throughout the world.

The *stainless steel* frames around the mirrors are absolutely non-rusting and may be kept clean and highly polished just by rubbing with a clean, dry cloth. No polish is necessary. Stainless steel is the perfect match for *chromium plated* bathroom fixtures; hence, the Gothic model as well as the square top model shown below are particularly recommended for bathrooms fitted with *chromium plated* fixtures where the budget does not permit the purchase of higher priced *chromium plated* models.

Plain mirror is regular equipment. Mitered line mirror may be had at additional cost. See price list.

The Gothic top model is available in two sizes as specified below.

MASTER JR. MODEL

Rounded Corners

The *stainless steel* framed cabinet illustrated on the left is recommended for the bathroom where the design is straight rather than arched or curved.

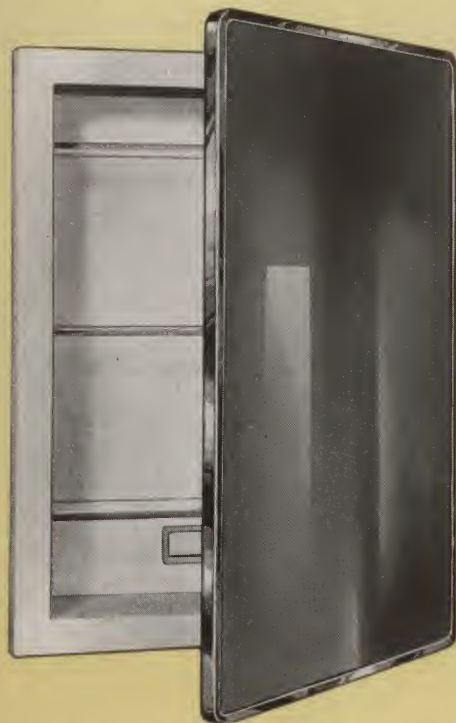

Plain mirror is regular equipment. Mitered line mirror may be had at slight additional cost. See price list.

This cabinet is available in three sizes as specified below.

SPECIFICATIONS

Number	Mirror	Wall Opening	Overall
2010	16"x26"	13 ³ / ₄ "x19 ³ / ₄ "x3 ¹ / ₂ "	16 ¹ / ₄ "x26 ¹ / ₄ "
2020	18"x28"	15 ³ / ₄ "x21 ³ / ₄ "x3 ¹ / ₂ "	18 ¹ / ₄ "x28 ¹ / ₄ "
2030	16"x22"	13 ³ / ₄ "x19 ³ / ₄ "x3 ¹ / ₂ "	16 ¹ / ₄ "x22 ¹ / ₄ "
2040	18"x24"	15 ³ / ₄ "x21 ³ / ₄ "x3 ¹ / ₂ "	18 ¹ / ₄ "x24 ¹ / ₄ "
2050	20"x28"	17 ³ / ₄ "x25 ³ / ₄ "x3 ¹ / ₂ "	20 ¹ / ₄ "x28 ¹ / ₄ "

Return flange 1 inch. Three bulb edge shelves, one flat glass shelf for the bottom of the cabinet, two toothbrush racks, used razor blade drop.

Nos. 2030, 2040, 2050

CAREY BATHROOM CABINETS

GENERAL SPECIFICATIONS

Steel and Construction — The steel used in the Carey line is ARMCO prime sheets, 20-ga., specially prepared for enameling.

The bodies of Carey cabinets are of one-piece construction. There are no open seams or joints to rust or gather dirt in the Carey models.

Door strikes are stainless steel. Bullet door catches are nickel plated. Door stops are the bar type, nickel plated. Shelf supports in the Carey line are steel, the "U" type of bracket, finished to match the interior of the cabinet. The two bottom shelf brackets are designed to accommodate six tooth brushes. All Carey cabinets are equipped with sufficient shelf brackets to provide for almost any adjustment of the shelves the user may require.

The frames on all framed models are stainless steel and are polished and buffed to a chrome finish.

Finish — All Carey cabinets are finished in three coats of first-quality baked on enamel applied over rust-resisting undercoat.

GOTHIC TOP MODEL

Illustrated on the right is a Gothic Top all-mirror front cabinet with no knob, hinges or ugly screw heads to mar the face of the mirror. We recommend the Gothic in either of the two sizes specified below.

The beautiful mirror covers the entire cabinet, so that when the cabinet is set in place the appearance is that of a mirror hung on the face of the wall.

The mirror illustrated is regular equipment. Plain beveled edge mirrors or mitered line beveled edge mirrors are available. See price list for difference in cost.

SQUARE TOP MODEL

The cabinet at the right, fitted with rectangular frameless mirror, is recommended for the bathroom built along simple lines. The mirror attached to the air-cushioned door with *stainless steel* mirror clips covers the entire front of the cabinet when the door is closed.

The mirror illustrated is regular equipment. Plain beveled edge mirrors or mitered line beveled edge mirrors are available. See price list for cost.

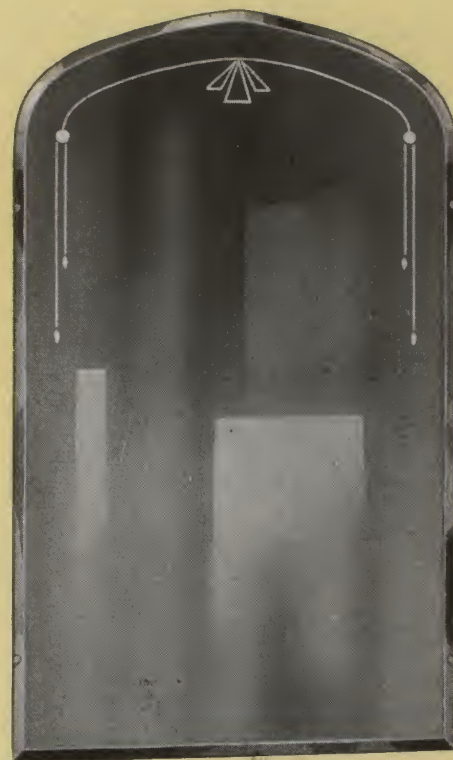

This cabinet is available in three sizes as specified below.

Three bulb edge glass shelves and *chromium plated* razor blade drop.

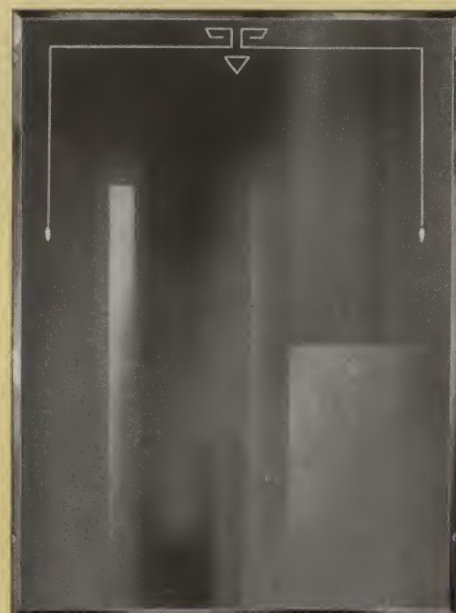

SPECIFICATIONS

No. 1616

VENETIAN ARISTOCRAT MODEL

The Aristocrat all-mirror front Venetian type cabinets illustrated on the left are designed for the home in the intermediate price bracket where cost must be considered but where quality is an important factor. These two cabinets are among the most popular in the entire line. The mirror is frameless, is held to the door with *stainless steel* mirror clips. Made in two sizes.

The mirror illustrated is regular equipment. Plain bevel edge mirrors are available.

SPECIFICATIONS

Number	Mirror	Wall Opening
660.....	16"x24"	13 $\frac{3}{4}$ "x19 $\frac{3}{4}$ "x3 $\frac{1}{2}$ "
670.....	18"x26"	15 $\frac{3}{4}$ "x21 $\frac{3}{4}$ "x3 $\frac{1}{2}$ "

Return flange 1 inch. Three bulb edge glass shelves, one flat glass shelf for the bottom of the cabinet, two toothbrush racks, used razor blade drop.

Framed Models

Four cabinets that are in keeping with the present trend towards greater use of metal in home building and home furnishing. The mirror on No. 1622-BF is set in a rich, black enamel frame that harmonizes with black and white tile bathrooms or bathrooms fitted with black fixtures.

The mirror on No. 1622-CF is set in a frame of *stainless steel*, polished and buffed to a chrome finish — a budget model suggested for the moderate priced bathroom, fitted with chromium plated accessories.

The mirror on No. 1826-CF is likewise set in a frame of *stainless steel*, polished and buffed to a chrome-like finish.

The mirror on No. 1616 is set in a *stainless steel* frame, polished and buffed to a chrome finish. An ideal model for installation in a man's bathroom — an abundance of storage space behind the door. The open shelf below the door furnishes ample shelf space for shaving and toilet articles.

The mirrors as illustrated are regular equipment. A plain mirror without etching is available on Models 1622-BF, 1622-CF and 1826-CF.

SPECIFICATIONS

Number	Mirror	Wall Opening	Overall

Return flange 1 inch. Three bulb edge glass shelves, one flat glass shelf for the bottom of the cabinet, two toothbrush racks, used razor blade drop.

[See page 22 for additional specifications]

FLUSH DOOR RECESSED CABINETS

Cabinets illustrated on this page are particularly recommended for public buildings, schools, hospitals, dormitories and office buildings.

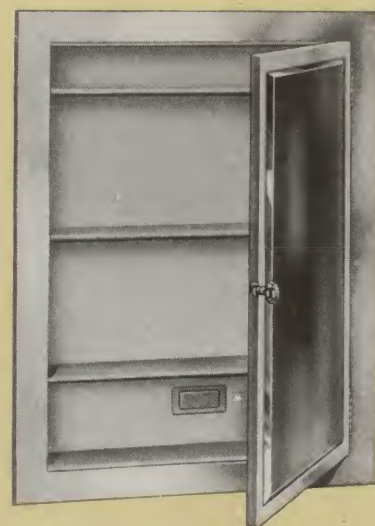

Thousands of No. 210 have been installed in U. S. Government Housing Projects.

Nos. 200, 230, 240 and 250 have been selected for dormitories at such well-known universities as Notre Dame, Columbia, Creighton, Duke, Yale, Texas and many other similar institutions of learning. Hospitals such as Fitzsimons General; U. S. Army, Denver, Colo.; U. S. Marine Hospital, Buffalo, N. Y.; Allegheny General Hospital, Pittsburgh, Pa.; Maternity Hospital, Cleveland, Ohio; and the Johns-Hopkins Hospital, Baltimore, Md., have installed cabinets of the type illustrated on this page.

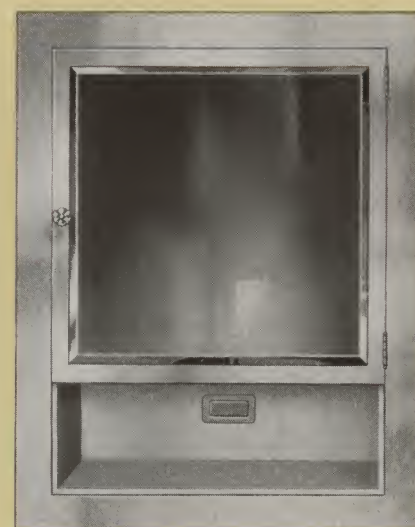

The illustrations show beveled plate mirrors. BE SURE AND SPECIFY WHETHER BEVEL PLATE OR PLAIN PLATE MIRRORS ARE REQUIRED WHEN ORDERING. BEVEL PLATE MIRROR COSTS MORE THAN THE PLAIN GLASS. SEE PRICE LIST FOR DIFFERENCE.

SPECIFICATIONS

SURFACE WALL CABINETS

The cabinets illustrated in the bottom right corner are designed to hang flush on the wall, and are recommended for use in old construction or in new construction where the thickness of the wall does not permit the use of recessed type cabinet. Also ideal for the yacht and steamship.

Many hundreds of this type cabinet are installed in such buildings as the Southwestern Bell Telephone Building, St. Louis, Mo., the U. S. Army and Navy Barracks, and in steamships and yachts traveling the seven seas. Two sizes.

No. 500

TOWEL SUPPLY and UTILITY CABINET

The towel supply and utility cabinet illustrated on the left is designed and constructed for the less pretentious bathroom where extra storage space is required.

There is no mirror in the door of this model.

The cabinet is equipped with five glass shelves.

White enamel is the regular finish. However, this model may be had in any color desired to match the tile or other bathroom fixtures. See price list for extra cost of special color.

SPECIFICATIONS

Return flange 1 inch. Five glass shelves furnished.

RECESSED SHELF—No. 410

Presenting in beautiful *stainless steel* — the everlasting metal — a vertical and a horizontal recessed shelf — practical units that should be included in every bathroom — for the storage of fancy toilet bottles or articles too large to store in the average medicine cabinet.

Model 410 is recommended for installation over the bathtub, in the downstairs lavatory, under the medicine cabinet — an ideal repository for the bath salts, bath brush and the sponge. A Vitrolite shelf is furnished for the bottom of the Model 410.

RECESSED SHELF—No. 411

Model 411 has a mirror-lined back and bottom shelf. Two glass shelves are furnished. This model, installed on the wall at the side of the bathroom cabinet or adjacent to the cabinet, provides not only additional storage space in the bathroom but adds a decorative touch as well.

No. 411 is also recommended for installation over the end of the bathtub to provide handy storage space for toilet articles used in connection with the bath.

Manufactured of beautiful *stainless steel*, these two recessed shelves will retain their lustre permanently and may be cleaned and polished with a dry cloth.

No. 410

ELECTRIC BATHROOM HEATER

Framed in brilliant chrome, the electric room heater illustrated at right rapidly removes the chill from the bathroom, dressing room or kitchen. Especially appreciated when the heating system is not in use.

The motor-driven fan behind the heating arrangement quickly distributes the heated air to every part of the room.

The attractively designed grille, with its close spacing, makes it impossible for even a small child to come in contact with the electrical or mechanical parts of the heater.

The warm air forced into the room by the motor-driven fan makes an excellent hair drying device, very much appreciated by the ladies.

The small motor which drives the fan offers no radio interference and requires no oiling.

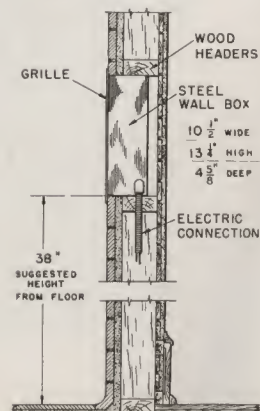

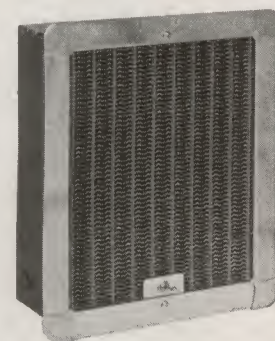

The heater is approved by the Fire Underwriters' Laboratories.

Heater Capacity — 1200 watts per hour. Furnished only for 110-120 volts, 60-cycle alternating current. Size of the wire to be used in connecting the heater is determined by the state or local building code. In most areas, a No. 14 two-wire connection is used.

COLONIAL BATHROOM CABINETS

Big Values for Low Cost Houses

IMPORTANT INFORMATION

Please Read These Specifications

IN THE Colonial line of bathroom cabinets, designed for houses costing \$5000 and less, Miami-Carey provides the trade with a more complete line of cabinets for low cost houses than is available from any other manufacturer.

Do not confuse Colonial bathroom cabinets with cheap tinware cabinets that are finished in a dip-coat of paint. Colonial cabinets are produced by the same craftsmen who for years have been manufacturing the justly famous Miami cabinet. Colonial cabinets receive the same careful attention to detail, construction and finish as do the more expensive models.

STEEL AND CONSTRUCTION — Colonial cabinets are constructed of ARMCO steel, 22-ga. prime sheets. The bodies are one-piece construction, no joints or open seams to catch dust, dirt, and provide starting places for rust.

MIRRORS — The mirrors in Nos. 401, 405, 406, 408 and 409 are window glass quality, $\frac{3}{16}$ " thick, selected silvering quality. The mirrors in Nos. 402, 403, 404, 400-CF, 400-BF and 407 are window glass regular thickness, selected silvering quality.

The mirrors in Nos. 405-A, 406-A, and 407-A, 408-A, and 409 are No. 1 selected plate glass, U. S. Commercial Standards CS-27-36.

When plate glass mirrors are furnished in Nos. 402, 403, 400-CF, 400-BF and 408-A, these mirrors are No. 1 selected plate glass, U. S. Commercial Standards CS-27-36.

The silvering on the mirrors in the Colonial line is

copper protected non-electrolytical. The silvering is guaranteed for five years against silver spoilage.

FINISH — Colonial Cabinets are finished in two coats of first-quality baked on enamel applied over a rust-resisting undercoat.

HINGES — Colonial cabinet door hinges are piano type finished to match the finish of the cabinet, concealed behind the door.

FRAMED MODELS

Cabinet No. 404 has a steel, white enameled frame around the mirror.

Cabinet No. 400-BF has a steel, black enameled frame around the mirror.

Cabinets Nos. 400-CF, 402, 403, 407 and 407-A are fitted with stainless steel mirror frames polished and buffed to a chrome finish. These are continuous one-piece frames.

COLONIAL LIGHTED CABINETS

The Colonial cabinets fitted with light brackets are complete in every respect. In addition to the light fixtures, these models are also fitted with switch to control the lights and an electric convenience plug for razor, curling iron and other electrical appliances. The light brackets are chromium plated.

Bulbs are not furnished. Any regular bulb may be used except that in cabinets Nos. 406 and 407, a T-10 clear bulb should be used.

All lighted cabinets are wired complete at the factory and are underwriter approved.

COLONIAL ALL-MIRROR FRONT MODELS

No. 408, 408-A

Cabinet No. 408 and 408-A, illustrated at lower left, is an all-mirror front model intended for the bathroom of the inexpensive house where the design is straight rather than arched or curved.

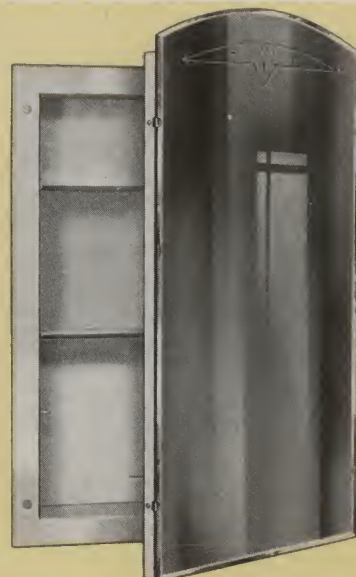

Cabinet No. 409, illustrated at lower right, is an all-mirror front cabinet in the larger size. The mirror is No. 1 quality plate glass.

SPECIFICATIONS

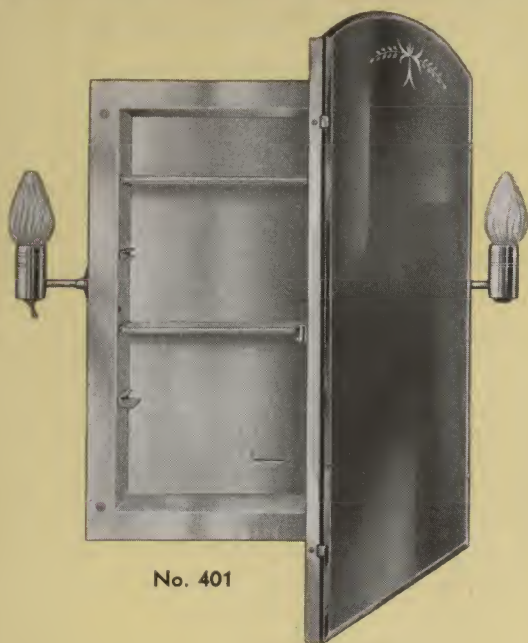

Number	Mirror	Wall Opening	Overall
408.....	16"x22"	13 $\frac{3}{4}$ "x18 $\frac{1}{4}$ "	16"x22"
409.....	16"x24"	13 $\frac{3}{4}$ "x19 $\frac{3}{4}$ "	16"x24"

No. 408 has two bulb edge glass shelves, die stamped razor blade drop, two toothbrush racks, bar type door stop.

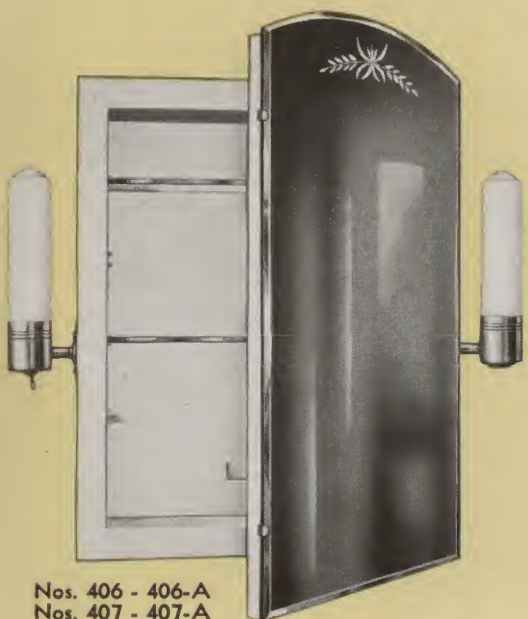

No. 409 has two bulb edge glass shelves, one flat shelf for the bottom of the cabinet, three sets of shelf brackets, two toothbrush racks, die stamped razor blade drop, bar type door stop.

No. 402
No. 403

COLONIAL BATHROOM CABINETS

No. 401

Colonial Bathroom Cabinet No. 401, illustrated on the left, is an all-mirror front, electrically equipped cabinet, including Colonial lights, switch to control the lights, and electric convenience plug. There is no frame around the mirror.

No. 406

Cabinet No. 406 is equipped with demi-tubular light bracket, light switch and electric convenience plug. It is an all-mirror front model, with no frame around the mirror. The mirror is $\frac{3}{16}$ " thick window glass, *selected* quality.

No. 406-A

Cabinet No. 406-A is the same as No. 406, except that the mirror is No. 1 *selected* quality genuine plate glass, U. S. Commercial Standard CS-27-36.

No. 407

Cabinet No. 407 is the same as No. 406, except that the mirror is set in a *stainless steel* mirror frame polished to a chrome finish.

No. 407-A

Cabinet No. 407-A is the same as No. 407, except that the mirror is No. 1 *selected* quality genuine plate glass, U. S. Commercial Standard CS-27-36.

No. 402

Cabinet No. 402 has a rich black enamel frame around the mirror. It is ideal for installation in bathrooms where black and white tile is used or bathrooms where black fixtures are used. This model is fitted with Colonial lights, light switch and electric convenience plug.

No. 403

Cabinet No. 403 is framed. The frame around the mirror is *stainless steel*, the everlasting metal, polished and buffed to a chrome-like finish — a perfect match for bathrooms fitted with the Colonial line of bathroom fixtures.

This model is fitted with Colonial light fixtures, light switch and electric convenience plug.

SPECIFICATIONS

Number	Mirror	Wall Opening	Overall
401	16"x22"	13 $\frac{3}{4}$ "x19"x3 $\frac{1}{2}$ "	16"x22"
406, 406-A	16"x22"	13 $\frac{3}{4}$ "x19"x3 $\frac{1}{2}$ "	16"x22"

403	16"x22"	13 $\frac{3}{4}$ "x19"x3 $\frac{1}{2}$ "	16 $\frac{1}{4}$ "x22 $\frac{1}{4}$ "

Two bulb-edge glass shelves, die stamped razor blade drop, two toothbrush racks, bar type door stop.

[See page 27 for additional information]

COLONIAL BATHROOM CABINETS

No. 404

No. 404 is an inexpensive recessed cabinet, designed for the extremely low-cost home, cottage or summer bungalow. The mirror is set in a steel, white enameled frame.

SPECIFICATIONS

Number	Mirror	Wall Opening
404.....	15 $\frac{1}{4}$ "x23 $\frac{3}{4}$ "	13 $\frac{3}{4}$ "x18 $\frac{3}{4}$ "x3 $\frac{1}{2}$ "
Regular Equipment: Door stop, one toothbrush rack, razor blade drop, two white enameled steel shelves.		

No. 405

No. 405, illustrated on the right, is an all-mirror front cabinet, the mirror covering the entire front. This cabinet is designed for the moderate priced home for which a cabinet without a frame around the mirror is required. The mirror has a bevel edge, and is attached to the door with *stainless steel* mirror clips.

No. 405-A

Cabinet No. 405-A is the same as No. 405; but is fitted with a No. 1 *selected* plate glass mirror — U. S. Commercial Standard CS-27-36. This cabinet is designed for the moderate priced home that calls for a cabinet fitted with a perfect mirror.

SPECIFICATIONS

Number	Mirror	Wall Opening
405 — 405-A.....	16"x22"	13 $\frac{3}{4}$ "x18 $\frac{1}{4}$ "x3 $\frac{1}{2}$ "
Regular Equipment: Two bulb edge glass shelves, bar type door stop, razor blade drop, two toothbrush racks.		

Nos. 400-CF — 400-BF

No. 400-CF, illustrated at right, is a framed cabinet, the mirror set in a *stainless steel* frame, polished and buffed to a chrome-like finish. An ideal model for the inexpensive bathroom in which chrome accessories are used.

No. 400-BF, illustrated at the right, has a rich black enamel frame around the mirror. The correct model to use where the accessories are other than chrome and where a black bullnose is used in the tile or as a decoration strip.

SPECIFICATIONS

CAREY LAUNDRY CHUTE DOOR

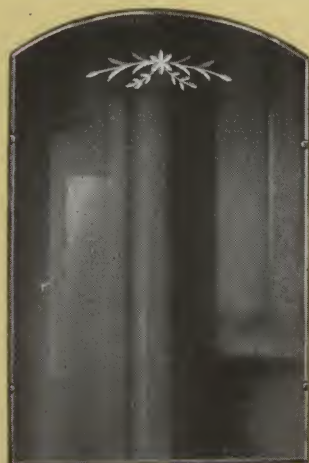

SPECIFICATIONS

Overall.....11¼"x14¼"x1¼"
Wall opening.....9"x12"
Door size.....8⅞"x12"

The Carey Laundry Chute Door, designed to replace the old-fashioned bulky and unsightly wood door, is indeed a worth while addition to any home. It will never warp or get out of square. Painted to match the color scheme of the home, it is a welcome successor to the old-fashioned wood door.

The Carey Laundry Chute Door, when installed, fits flush against the plaster line. There is no return flange on these units. The door itself is fitted with a heavy spring closer that keeps the door shut at all times. This conforms to fire underwriters' regulations in many cities.

The Carey Laundry Chute Door is manufactured of heavy gauge *Armco* autobody steel, finished in prime coat. The unit arrives at the job all ready to install — no hardware to buy, no doors to fit. Four cadmium plated installing screws are furnished. These screws will never rust. The four corners of the body are reinforced with steel angles so that the unit will never sag. The door is held closed with a spring door catch and a brass bullet catch. This complete unit costs less than the old style wood door. It can be installed in five to ten minutes time.

Left: Cabinet Nos. 1 and 3

COLONIAL BATHROOM CABINETS

In addition to a complete line of recessed bathroom cabinets, Miami offers several inexpensive wall hung cabinets suitable for installation in lavatories, public washrooms or wherever a mirror faced cabinet is desired. Especially suitable where wall construction does not permit the installation of recessed models.

Nos. 1 and 3

(Lower Left)

An inexpensive arched top wall hung cabinet covered with an all-mirror front door.

Available in two sizes as listed below:

SPECIFICATIONS

	Mirror Size	Body Size
No. 1.....	12"x18"	11½"x15¾"
No. 3.....	14"x20"	13½"x17¾"
Mirror, ⅜" window glass, selected silvering quality; regular equipment, two bulb edge glass shelves.		

No. 2

(Lower Right)

An all-mirror front straight top inexpensive wall hung cabinet to hang on the face of the wall.

Available in one size as listed below:

SPECIFICATIONS

	Mirror Size	Body Size
No. 2.....	12"x16"	11½"x15¾"
Mirror, ⅜" window glass, selected silvering quality; regular equipment, two bulb edge glass shelves.

HOTEL BATHROOM CABINETS AND MIRRORS

Cabinets illustrated on this page were developed by Miami-Carey designers in co-operation with hotel architects. Design and equipment are based on long experience and thorough knowledge of hotel requirements. Thousands of these cabinets are installed in the world's leading hotels, clubs and public buildings. The cabinets illustrated are practical. This is a proven fact. However, if you are designing a new hotel or remodeling an old one, the Miami-Carey organization will co-operate with you in working out your own ideas.

Nos. AS-110 AND AS-410

Regular equipment for the AS-110 and AS-410 consists of overhead curved towel tray with douche bag hooks, center light fixture complete with opal shade and electric convenience plug, white enameled combination soiled towel and razor strop hook, light switch, bottle opener, razor blade drop, three adjustable glass shelves and one opal shelf.

Mirror	12"x16"
Wall opening	14"x24 $\frac{3}{4}$ "x3 $\frac{1}{2}$ "
Overall	16"x26"

Nos. 907, 908 AND 909

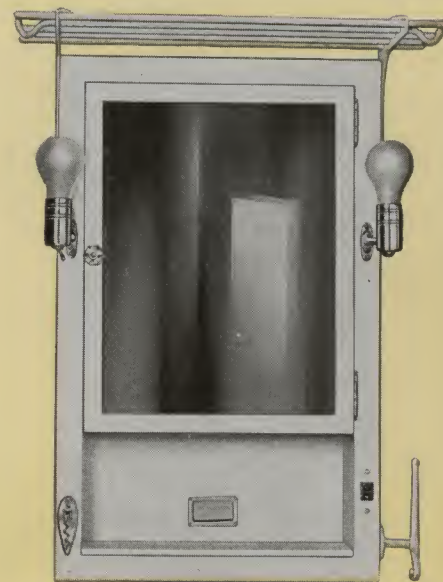

This model consists of a mirror fitted with keyhole slots for concealed hanging on the wall, a projecting glass shelf and a towel bar underneath the shelf. Suggested for the inexpensive hotel guest room and for the public washroom where the only storage space required is for comb and brush and a few toilet articles that may be set on the projecting glass shelf. The towel bar underneath the glass shelf is long enough to accommodate the towels required for this type of room. The frame around mirror is steel, white enameled. Made in three sizes.

MIAMI

CHROMIUM BATHROOM ACCESSORIES

A FEW years ago, the bathroom fitted with *chromium plated* accessories was the exception rather than the rule. Today, the picture is different. *Chromium plated* bathroom accessories have arrived — they are the rule rather than the exception. WHY? They are brilliantly beautiful. They match *chromium plated* fixtures. They add the final touch to today's bathroom. They are easier to install. Fitted with front flanges, they eliminate open joints. They will not crack or craze. They can be removed

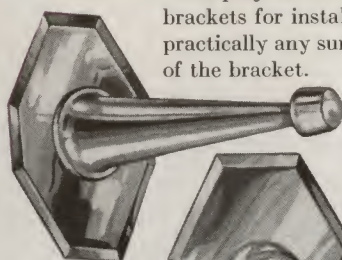

for replacement without damaging the finished wall.

Miami Accessories illustrated on pages 32 and 33 are manufactured of *selected brass*, over which is applied, first, a thick coating of nickel, and then a covering of hard chromium — the "Everlasting Accessory."

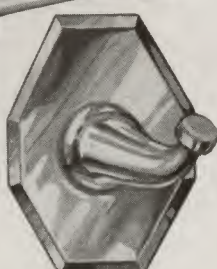

When ordering Miami Accessories, be sure and specify the type of bracket required by adding the prefix "L" to the model number for the lug type. Add the prefix "S" to the model number for screw-on type.

PROJECTION TYPE ACCESSORIES

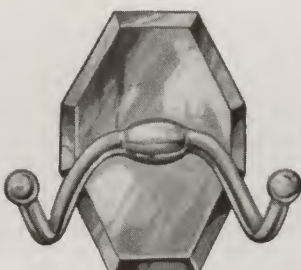

All projection accessories illustrated on this page and the following page are furnished with "L" lug type brackets for installing fixtures permanently into the wall or the "S" screw-on type that fastens readily to practically any surface. The installing screws used with the "S" accessories are concealed by the front plate of the bracket.

PRESENTING — in the very latest design — Miami-Carey COLONIAL Bathroom Accessories.

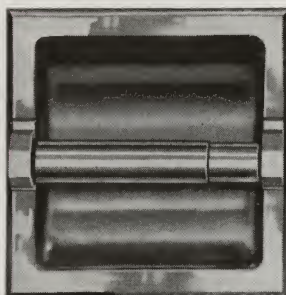

Colonial accessories, in the designs illustrated on this and following pages, were designed for us by one of the nation's outstanding architects.

The Colonial accessories are manufactured of "Zamac" metal, developed by the New Jersey Zinc Company, and now recognized to be the cleanest alloy of metals that can be found. There are practically no impurities in Zamac. It has great strength and shows no depreciation from age. It is non-corrosive and is used extensively in automobiles, electrical appliances, business machines and other equipment that must stand hard usage.

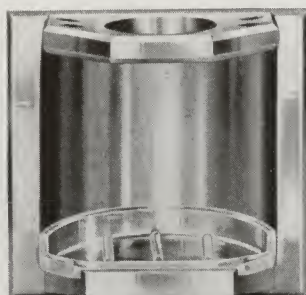

Finish — Colonial accessories are triple coated. First, a heavy coating of pure *copper plating*. Second, a coating of *nickel* and, finally, a heavy coating of pure *chromium*. The result is the finest plating job yet offered the trade.

Illustration at top left shows method of installing "L" type accessories in the wall.

The illustration at bottom left shows the method of attaching "S" type (which is the screw-on fixture) to the wall.

When ordering projecting type accessories, it is not necessary to specify "L" or "S" type. We furnish both the "L" and "S" type installing plates with each projecting accessory. You may use whichever plate meets your installation requirements.

Only Miami-Carey furnishes this service.

CASCADE

BATHROOM ACCESSORIES

FINISH

Cascade Accessories are triple plated. First with pure copper, then nickel and finally with a heavy deposit of hard chrome. This method produces a brilliant, durable finish that resists wear and retains its beautiful lustre. Wipe with a dry cloth to clean — no polish required.

Cascade projection type accessories are regularly furnished with chrome plated wood screws for attaching to the wall.

Toggle bolts can be furnished if required. See price list.

Special Cement Lug — Any Cascade projection type accessories can be furnished with a special lug so that they can be installed, by keying, into a cement wall. Nominal extra charge for lug. See price list. NOTE: Specify "L" type when lug is wanted.

MATERIAL SPECIFICATIONS

Cascade recessed type accessories are drawn from seamless brass. The towel bars, except the wall brackets, are all manufactured of brass.

Cascade projecting type accessories are actual castings made of *Zamac* metal. *Zamac* is the purest, cleanest and one of the strongest metals used in the manufacture of automobile and furniture hardware.

RECESSED TYPE ACCESSORIES

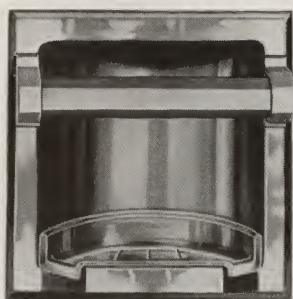

Cascade Accessories — a complete assortment of genuine chromium plated bathroom accessories in the oval design — ever new and ever pleasing.

Cascade Accessories are not intended to take the place of Miami all-brass accessories (manufactured of the most expensive materials for installation in the high-priced home and apartment) or Colonial Accessories (priced to meet the requirements of the average American home). Cascade Accessories are appropriate

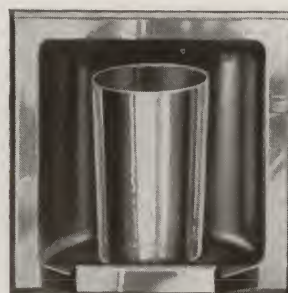

for the modest home where cost must be considered and quality is desired.

Do not confuse the Cascade Line of accessories with the many cheap stamped and wire accessories on the market. Cascade Accessories have strength and an everlasting finish.

ACCESS DOORS

HINGED DOOR TYPE

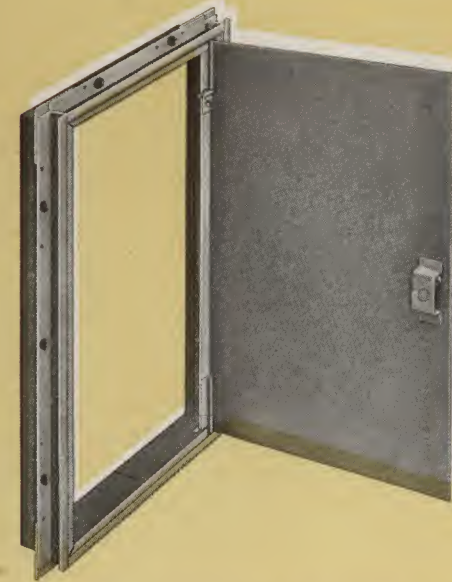

Carey Hinged Access Doors permit quick, easy access to pipes, plumbing valves, air shafts, electric wiring, etc. They come as a unit, ready to place in wall or ceiling without special framework or bucks. Frames are of sixteen (16) U. S. gauge galvanized steel, reinforced at corners and with perforated key or fastening flanges for plastered surfaces. Frames may also be had for walls faced with marble or tile or for masonry walls requiring face flange only. Lids are of fourteen (14) gauge, stretcher leveled steel and are equipped with fixed and operative pivot, as well as cam lock, which automatically backs lid from frame when the exposed, flush screw head bolt in door, is turned.

Carey Access Doors fit flush with wall surface and may be papered or decorated over. They receive a shop coat of enamel baked on before leaving factory.

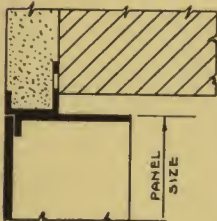

SPECIFICATIONS

Number	Panel Size	Wall Opening	Weight
711.....	7½"x11½"	8"x12"	6 lbs.
1216.....	12½"x16½"	13"x17"	10 lbs.
1418.....	14½"x18½"	15"x19"	14 lbs.
1824.....	18½"x24½"	19"x25"	25 lbs.
1830.....	18½"x30½"	19"x31"	30 lbs.

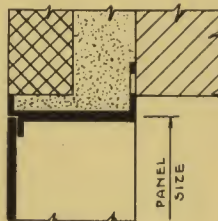

Carey Access Doors with "A" type flange for plastered walls are carried in stock ready for immediate shipment. Access Doors for marble and tile faced walls and plain flanged type ("C") are carried knocked down and require a few days for assembly. When ordering be sure to designate type flange (A, B or C) wanted. When not specifically mentioned "A" type will be furnished.

The above illustration shows access door open, exposing "back out" type cam lock; fixed and operative pivot; frame with plaster key flange "A" and reinforced corners.

Type "A" plaster key flange for all types of walls faced with plaster.

Type "B" key flange set back from face of panel for tile or marble-faced walls.

Type "C" has one inch face flange; only for glazed brick or unfinished masonry walls.

SCREW DOOR TYPE

The frames are heavy gauge *Armco* autobody steel. All corners are reinforced. Frames are fitted with plaster hooks. They may also be nailed or screwed to wood studs.

The door is 14-gauge *Armco* autobody steel. Door fits snugly against inside sill of the frame. The edges of the frame and door are flush with plaster. Doors can be covered with wallpaper or painted so as to be almost invisible. A screw driver is the only tool needed to open the door. The removable door can then be put aside out of the way of men working.

When ordering, state whether doors are to be set in plaster faced walls or in walls faced with marble or tile. Flange depths are set back for tile or marble walls.

SPECIFICATIONS

Number	Panel Size	Wall Opening	Weight
812.....	7½"x11½"	8"x12"	6 lbs.
1317.....	12½"x16½"	13"x17"	12 lbs.
1519.....	14½"x18½"	15"x19"	16 lbs.
1925.....	18½"x24½"	19"x25"	19 lbs.
1931.....	18½"x30½"	19"x31"	25 lbs.

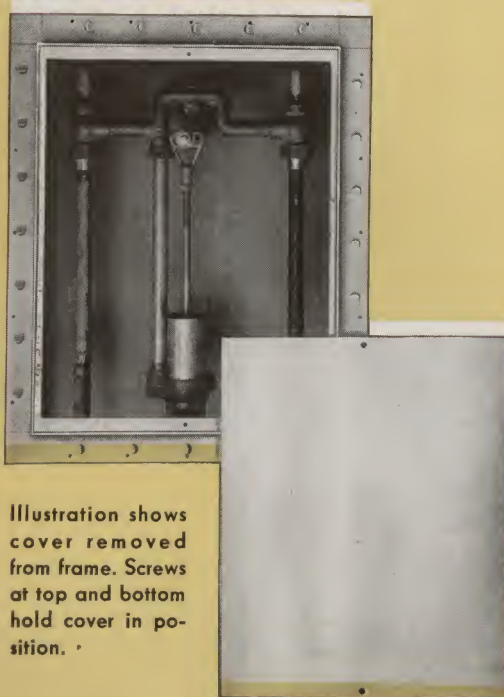

Illustration shows cover removed from frame. Screws at top and bottom hold cover in position.

MIAMI WALL HUNG MIRRORS

● The mirrors illustrated on this page are for hanging on surface of wall above lavatory or wherever a mirror is required.

Thousands of Miami mirrors are installed in public washrooms, in schools, clubs, office buildings, theatres, railroad stations, hospitals, hotels and steamships. The S. S. Manhattan and the S. S. George Washington, of the U. S. Line, are completely equipped with Miami-made mirrors.

There is a Miami mirror for every purpose. If the mirrors and sizes illustrated on this page do not meet your requirements, send complete details to our home office.

STEEL FRAMED MIRRORS

Nos. 1-N, 2-N and 3-N (top right) are steel framed, the frame finished in first quality white baked enamel.

Frames may be had in special color if desired. Beveled and plain mirrors are available.

SPECIFICATIONS

Number	Mirror	Overall
1-N.....	16"x22"	17 $\frac{1}{4}$ "x23 $\frac{1}{4}$ "
2-N.....	14"x18"	15 $\frac{1}{4}$ "x19 $\frac{1}{4}$ "
3-N.....	12"x16"	13 $\frac{1}{4}$ "x17 $\frac{1}{4}$ "
10.....	12"x18"	12 $\frac{5}{8}$ "x18 $\frac{5}{8}$ "
11.....	14"x20"	14 $\frac{5}{8}$ "x20 $\frac{5}{8}$ "
12.....	16"x20"	16 $\frac{5}{8}$ "x20 $\frac{5}{8}$ "
13.....	16"x22"	16 $\frac{5}{8}$ "x22 $\frac{5}{8}$ "
14.....	18"x24"	18 $\frac{5}{8}$ "x24 $\frac{5}{8}$ "
15.....	20"x28"	20 $\frac{5}{8}$ "x28 $\frac{5}{8}$ "

CHROME FRAMED MIRRORS

Illustrated below is a plain plate mirror set in a brass, chromium plated frame, channel type. The back behind the mirror is Armco galvanized steel. The mirror frame is $\frac{9}{16}$ "x $\frac{1}{2}$ "x $\frac{9}{16}$ ".

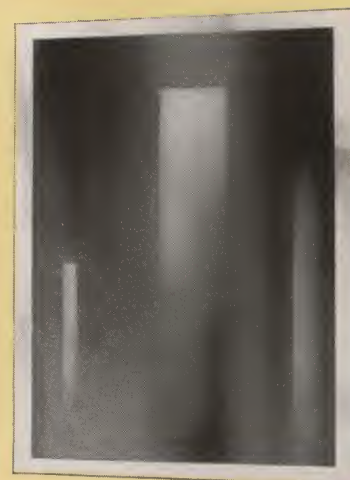

The mirrors illustrated on this page are No. 1 genuine plate glass, in accordance with U. S. Commercial Standard CS-27-36, copper protected non-electrolytically, guaranteed for five years against silver spoilage.

Electrolytically copper backed mirrors are available when desired. Prices on application.

All mirrors illustrated are fitted with keyhole slots for concealed hanging on the wall. See diagram No. 1.

Mirrors fitted with brass angle frame and theft-proof device are available in the sizes listed under specifications. Prices on request.

See diagram No. 2 of theft-proof device and hanging method used on angle frame mirrors.
